

VERTICALLY ADJUSTABLE RACK MOUNTED DISPLAY ASSEMBLY

ABSTRACT OF THE DISCLOSURE

A vertically adjustable display assembly includes a display and support arms movable between a storage position and a viewing position. The display assembly
5 also includes rotation support brackets slidably attached to slots formed in the support arms such that as the display assembly rotates from the viewing position to the storage position, the rotation support bracket will
position the display with respect to the support arms to
10 be properly position with respect to a keyboard to be placed in the storage position.
